Important EIA NOTE: Beginning December 8, 2008, the EIA discontinued publication of **Low Sulfur Diesel (LSD)** prices at the U.S. level. The EIA stated that “**LSD** price estimates at the U.S. level no longer meet accuracy requirements due to a diminishing number of stations selling **LSD** as a result of the Environmental Protection Agency's Diesel Fuel Regulations.” The statistical agency will continue to collect **LSD** prices from the retail outlets in its sample; however, **LSD** prices will only be included in the nationwide average for all types of diesel. The prices for the **national average and ULSD** will continue to be published weekly.
